

NumPy Exercises

Now that we've learned about NumPy let's test your knowledge. We'll start off with a few simple tasks, and then you'll be asked some more complicated questions.

Import NumPy as np In [1]: Create an array of 10 zeros In [2]: array([0., 0., 0., 0., 0., 0., 0., 0., 0.]) Create an array of 10 ones In [3]: Out[3]: array([1., 1., 1., 1., 1., 1., 1., 1., 1.]) Create an array of 10 fives In [4]: Out[4]: array([5., 5., 5., 5., 5., 5., 5., 5., 5.]) Create an array of the integers from 10 to 50 In [5]: array([10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50]) Create an array of all the even integers from 10 to 50 In [6]: Out[6]: array([10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50])

Create a 3x3 matrix with values ranging from 0 to 8

```
In [7]:
        array([[0, 1, 2],
 Out[7]:
               [3, 4, 5],
               [6, 7, 8]])
        Create a 3x3 identity matrix
 In [8]:
        array([[ 1., 0., 0.],
 Out[8]:
               [ 0., 1., 0.],
               [0., 0., 1.]
        Use NumPy to generate a random number between 0 and 1
In [15]:
        array([ 0.42829726])
Out[15]:
        Use NumPy to generate an array of 25 random numbers sampled from a
        standard normal distribution
In [33]:
        array([ 1.32031013, 1.6798602 , -0.42985892, -1.53116655, 0.85753232,
Out[33]:
                0.87339938, 0.35668636, -1.47491157, 0.15349697, 0.99530727,
               -0.94865451, -1.69174783, 1.57525349, -0.70615234, 0.10991879,
               -0.49478947, 1.08279872, 0.76488333, -2.3039931, 0.35401124,
               -0.45454399, -0.64754649, -0.29391671, 0.02339861, 0.38272124])
        Create the following matrix:
In [35]:
        array([[ 0.01, 0.02, 0.03, 0.04, 0.05, 0.06, 0.07, 0.08, 0.09,
                                                                           0.1],
Out[35]:
                                                                           0.2],
               [0.11, 0.12, 0.13, 0.14, 0.15, 0.16, 0.17, 0.18, 0.19,
               [ 0.21, 0.22, 0.23, 0.24, 0.25, 0.26, 0.27, 0.28, 0.29,
               [0.31, 0.32, 0.33, 0.34, 0.35, 0.36, 0.37, 0.38, 0.39,
               [0.41, 0.42, 0.43, 0.44, 0.45, 0.46, 0.47, 0.48, 0.49,
                                                                           0.5],
               [ 0.51, 0.52, 0.53, 0.54, 0.55, 0.56,
                                                       0.57, 0.58, 0.59,
                                                                           0.6 ],
               [0.61, 0.62, 0.63, 0.64, 0.65, 0.66, 0.67, 0.68, 0.69,
                                                                           0.7],
               [ 0.71, 0.72, 0.73, 0.74, 0.75, 0.76, 0.77, 0.78, 0.79,
                                                                           0.8],
               [0.81, 0.82, 0.83, 0.84, 0.85, 0.86, 0.87, 0.88, 0.89,
                                                                           0.9],
               [0.91, 0.92, 0.93, 0.94, 0.95, 0.96, 0.97, 0.98, 0.99,
        Create an array of 20 linearly spaced points between 0 and 1:
In [36]:
Out[36]: array([ 0.
                       , 0.05263158, 0.10526316, 0.15789474, 0.21052632,
                                                               0.47368421,
                0.26315789, 0.31578947, 0.36842105, 0.42105263,
                0.52631579, 0.57894737, 0.63157895, 0.68421053, 0.73684211,
                0.78947368, 0.84210526, 0.89473684, 0.94736842, 1.
                                                                         ])
```

Numpy Indexing and Selection

Now you will be given a few matrices, and be asked to replicate the resulting matrix outputs:

```
In [38]:
          mat = np.arange(1,26).reshape(5,5)
          mat
         array([[ 1, 2, 3, 4, 5],
Out[38]:
                [6, 7, 8, 9, 10],
                [11, 12, 13, 14, 15],
                [16, 17, 18, 19, 20],
                [21, 22, 23, 24, 25]])
In [39]:
          # WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
          # BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
          # BE ABLE TO SEE THE OUTPUT ANY MORE
In [40]:
         array([[12, 13, 14, 15],
Out[40]:
                [17, 18, 19, 20],
                [22, 23, 24, 25]])
In [29]:
          # WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
          # BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
          # BE ABLE TO SEE THE OUTPUT ANY MORE
In [41]:
         20
Out[41]:
In [30]:
          # WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
          # BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
          # BE ABLE TO SEE THE OUTPUT ANY MORE
In [42]:
         array([[ 2],
Out[42]:
                [7],
                [12]])
In [31]:
          # WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
          # BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
          # BE ABLE TO SEE THE OUTPUT ANY MORE
In [46]:
         array([21, 22, 23, 24, 25])
Out[46]:
```

```
In [32]:
          # WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
          # BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
          # BE ABLE TO SEE THE OUTPUT ANY MORE
In [49]:
Out[49]: array([[16, 17, 18, 19, 20],
                [21, 22, 23, 24, 25]])
        Now do the following
        Get the sum of all the values in mat
In [50]:
         325
Out[50]:
        Get the standard deviation of the values in mat
In [51]:
         7.2111025509279782
Out[51]:
        Get the sum of all the columns in mat
In [53]:
Out[53]: array([55, 60, 65, 70, 75])
```

Great Job!
